

NC4 RISK CENTER™

NC4 utilizes sophisticated technology to provide customers 24x7 coverage of worldwide incidents.

Mitigating Risks to the Organization

Threats know no organizational boundaries. Security breaches can be targeted at any part of an organization and can quickly impact stakeholder value. Up-the-ante when you factor in globalization. Security professionals tasked with protecting their organization's brand, reputation, intellectual property, physical assets, and employees must have the skills, as well as the resources and technology needed for risk-related information collection. Only then can a coordinated response be executed for mitigating risks to the organization, thereby increasing stakeholder value.

Security executives count on NC4 to enhance their risk mitigation programs. The NC4 Risk Center™ solution integrates technology and resources around all-hazards information collection and analysis, improving a security department's capabilities in monitoring, gathering, analyzing, reporting, escalating and responding to risks that threaten their organization's well-being.

"This level of intelligence is invaluable to our organization's risk management and mitigation program."

John Martinicky
Director of Global Security
Navistar

"I would recommend NC4 to any corporate security department. They are a tremendous asset in helping us secure the welfare of our employees."

Mitchell Hatt
Global Security Specialist
CA Technologies

Benefits Spotlight

NC4 helps security professionals mitigate risks to the organizations they serve. The NC4 Risk Center™ solution delivers relevant information to enable a rapid, effective and efficient response to incidents that could cause business disruption or impact employee health and safety, and ultimately, threaten stakeholder value.

Quickly learn about risks threatening assets, operations and traveling employees to:

- ☰ Ensure business continuance
- ☰ Protect the health, life, safety, and productivity of employees
- ☰ Streamline decision-making processes
- ☰ Reduce labor costs

Situational Readiness

Relevant information to mitigate risks

Business disruptions usually don't just happen. They evolve out of every day events and it is the awareness and early warning of those events that create the precious extra time that is needed to respond to both minor and extreme situations, so that employees, facilities and business operations are protected.

But where do organizations turn to gain that awareness and early warning of impending threats? The Internet and media is a cacophony of noise, blurring the lines of what's relevant information and what's not. For those tasked with the welfare of employees' lives and safety, and the organizations physical assets and continuity of business operations, this constant stream of unfocused information confuses what's relevant for mitigating risks.

Over the past decade, customers have relied on NC4 to be their eyes and ears. NC4 has the technology and experience to sift through the clutter surrounding us in today's Information Age, to bring focused, relevant information to each customer's individual risk mitigation program, whether it be in the area of security, business continuity and/or supply chain management.

"Employees praised security for letting them know what was going on. They said they felt safer."

John Martinicky
Director of Global Security
Navistar

NC4 Risk Center: your resource for relevant risk information

Utilizing sophisticated technology, NC4's team of highly skilled analysts leverage thousands of diverse information sources to provide early warning of incidents at the neighborhood, regional, national and international levels. Analysts evaluate incident intel in real-time, reporting all incidents that could threaten business assets, operations and/or traveling employees, such as suspicious packages, plane crashes, wildfires, hurricanes, earthquakes, explosions, 3-alarm fires, hazardous materials spills, tanker truck accidents, interstate highway closures, severe weather, and more.

NC4 Risk Center promptly alerts customers to risks occurring near their assets that pose a threat to employees' life and safety, physical assets or continuity of business operations.

"NC4 is so much faster than iJet."

Hamilton Mixon
Senior Director, Risk and Global Security
Vertex Pharmaceuticals

ActivWeather™

ActivWeather, the meteorological reporting tool for NC4 Risk Center, integrates real-time weather data to provide detailed, customized, and comprehensive alerts that further enhance situational awareness.

ActivWeather content is made possible through a partnership with WeatherBug®, the leading provider of live, local weather information services. WeatherBug manages and operates a proprietary network of thousands of weather stations and cameras in the U.S. and parts of Canada. These professional-grade weather stations record 27 different weather variables updated every two seconds to generate unparalleled neighborhood-level reports.

Utilizing NC4 Risk Center's powerful profiling system, users create weather profiles to tailor ActivWeather alerts to their locations and reporting preferences. Only weather information that matches the profile will trigger an alert. Weather alerts are categorized by flash floods, dust storms, severe thunderstorm warnings, tropical storm warnings and more.

NC4's ActivWeather is a powerful capability that enhances situational awareness.

Continuous visibility of NC4 tracked incidents shown on NC4's Situation Map gives you immediate awareness of threatening situations happening around your asset locations, including critical facilities and traveling employees.

Relevant and personalized information

One of the key features of NC4 Risk Center is the ability to personalize information to what is relevant to you. The driving factors behind this capability are customer-defined interest profiles and the methodology analysts employ to report incidents. Analysts specify the type and severity level of an incident, geo-locating it to the specific latitude and longitude. Using these three criteria – type, location and severity – customers create an interest profile to tailor alerts to only those that could impact their organization and fall under their scope of responsibility.

“NC4 Risk Center is wonderful. The quality of information we receive from NC4 Risk Center can't be emulated.”

Bhavesh Patel
Senior Director of Global Risk and Business Resources
Genzyme

Predictive global intelligence

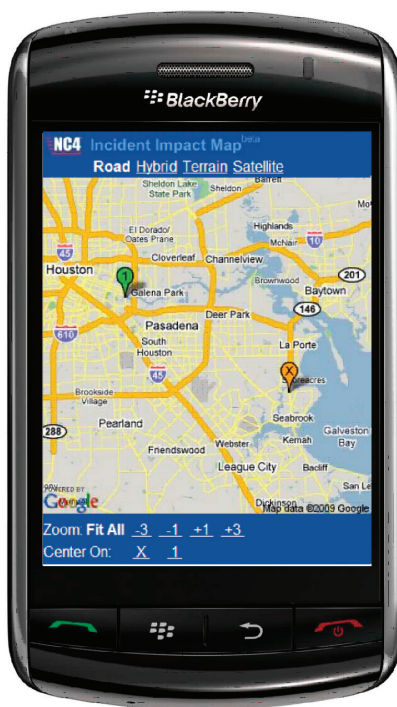

NC4 Risk Center provides predictive intelligence of global risks with these analysis components:

- ≡ **Analytical Briefs** – provides members with analytical security and risk assessments that contain “what they need to know, before they know they need to know it”
- ≡ **Country Reports** – aids members in the decision-making process about travel, expatriates, dependent relocation and more
- ≡ **Global Flashpoints** – keeps members informed of world events that may affect corporate interests
- ≡ **Situation Reports** – Analysis of scheduled events may require security preparation, such as the Olympic Games, World Bank/IMF meetings, Ryder Cup, Paris Air Show, World Cup Soccer, etc. NC4 provides assessments of associated risks and recommended responses.

Additional services

Realizing that no two organizations are alike, NC4 tailors offerings to fit specific needs. Enhancements to NC4 Risk Center for Security Operations include the following:

- ≡ **Travel Risk Management** – prepare travelers with pre-trip advisories and receive alerts of at-risk travelers
- ≡ **Incident Tracking** – enter, track, communicate and share incidents within your organization to improve company-wide awareness and coordination
- ≡ **ActivMobile** – view incident and asset information on a smart phone optimized map
- ≡ **HRAP** – query the entire NC4 Risk Center incident database to create customized reports to support facility planning, assess incident impact and perform other analytical tasks

ActivMobile

More about NC4

NC4's Situational Readiness solutions are a suite of integrated applications that revolutionize how government and businesses collect, manage, share and disseminate information to mitigate risks, manage incidents, and securely communicate and collaborate with one another. Aggregating and integrating information from public and private sources, NC4 leverages its cutting-edge technologies to bring users a highly customized presentation of relevant information in a single, easy to use console.

NC4 has a number of solutions that address the specific needs of corporate security, business continuity, enterprise risk management, supply chain management, travel management, crisis management, emergency management, intelligence fusion and law enforcement, as well as for federal agencies with a need to share critical information across organizational boundaries.
